#### **DETAILED ACTION**

#### Introduction

1. Applicants' amendments and remarks filed on 3/4/2008 and 4/3/2008 have been entered. Claim 1 has been amended. New claim 7 has been entered. Claims 1-4 and 7 are active.

- 2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
- 3. In response to the amendments, the grounds of rejection have been updated as set forth below. Rejections not maintained are withdrawn.

### Claim Rejections - 35 USC § 102

4. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Andrieu et al. [US 6261721].

Andrieu's invention relates to a cell separator comprising a microporous polymer [col. 1, ll. 44-46]. The porosity of the separator is in the range from 35% to 90% [col. 1, ll. 62-64]. The average pore diameter is in the range from 0.1 µm to 5 µm [col. 2, ll. 5-6]. The microporous polymer can be selected from polyvinylidene fluoride (fluororesin), cellulose polyacetate (cellulose acetate resins), and polypropylene, etc. [col. 2, ll. 7-13]. The macroporous polymer is obtained by processes such as phase inversion (conversion), etc. [col. 2, ll. 31-32].

For claims 1-4, since Andrieu teaches that the microporous polymer can be selected from polyvinylidene fluoride (fluororesin), cellulose polyacetate (cellulose acetate resins), and polypropylene, etc., which are deemed to be chemical-resistant polymeric compound

Art Unit: 1794

[specification, pp. 3-4], and a cell separator necessarily comprises communicating microporous, Andrieu anticipates the limitation "a chemical-resistant polymeric compound covering the porous film base, wherein the porous film comprises a multiplicity of communicating micropores". Further, Andrieu teaches all the remaining features of the instant invention as claimed.

## Claim Rejections - 35 USC § 103

- 5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. Claim 7 is rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Andrieu et al. [US 6261721].

The teachings of Andrieu are again relied upon as set forth above.

For claim 7, Andrieu is silent about the pure water permeation rate of the cell separator. However, since Andrieu anticipates all the structure and composition features of the claimed invention, a workable water permeation rate is deemed to be either anticipated, or obviously provided by practicing the invention of prior art, dictated by the same end use requirements.

### Response to Arguments

7. Since the Nagou et al. reference has been withdrawn, applicants' arguments directed to Nagou et al. are moot.

Art Unit: 1794

#### Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Victor S. Chang whose telephone number is 571-272-1474. The examiner can normally be reached on 7:00 am - 5:00 pm, Tuesday - Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rena Dye can be reached on 571-272-3186. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
